

Model BLT-100
ZENITH Standard Open-Hopper Bin Lifter

Pictured above is the standard design of Zenith Binlifter for use in Singapore with trunion-arm suitable for HDB metal bins and is also compatible with the HDB CRC dustscrew collection.

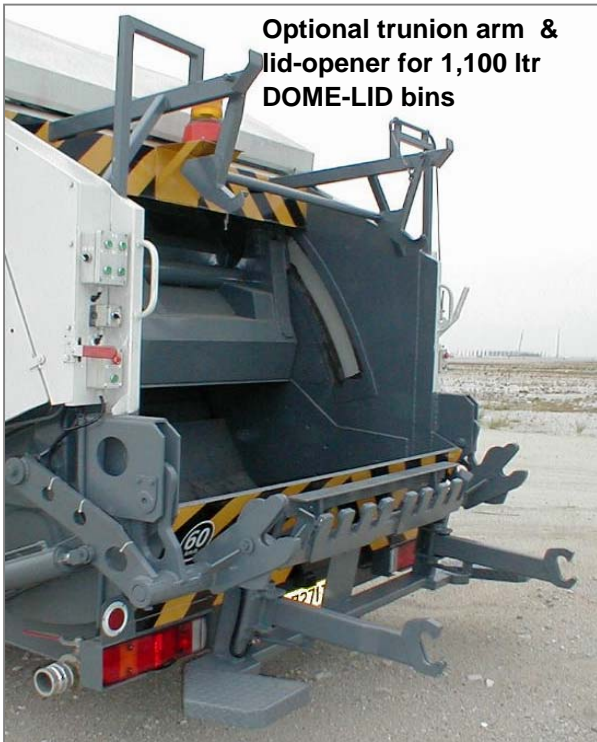

Zenith Bin-Lift Model BLT-100 able to lift Bulk-bins ranging EITHER from 120 to 660 ltrs OR 240ltr to 1,100 ltr flat-lid bins, conforming to DIN 30.700 and DIN 30.740 and modified Paladin containers .

Bin lift is actuated by manual levers ie always located on the kerb side (optional for both sides operation upon request) . Low rave height allows manual emptying of refuse bags .

Cycle time is between 9 to 17 secs without dwelling time (assuming engine speed at 1,100 rpm & PTO output ratio is min 85% and also dependant on weight of the loaded bins)

2 X double acting cylinders capable of lifting maximum 800 kg loaded DIN bins.

Trunion Lifting is available upon request .

Optional trunion arm & lid-opener for 1,100 ltr DOME-LID bins

Hong Kong version without trunion arm for 660 to 1,000 ltr flat lid bins

Philippines version without trunion arm for 120 to 660 ltr MGB DIN bins
