Refuse collection Vehicle (Rear End Loader)

Project Ref : ZP3791JK Delrld : Apr2010

Pictured below Model ZE2613 CBS, 20m3 body volume on 28MT GVW chassis

The 2 leachate tanks on the sides upgraded to S/S 304 approx 180 ltr capacity (capacity varies depending on avaiabel space).

Body & Tailgate tare weight is approx 6,100kg , excluding the binlifter (~350kg), 2 x 250ltr leachate tank (~280kg), side-stowage compartments (~150kg) .

Having all sides of the body curved and without ribs offers the following advantages :

- water does not accumulate on the roof , hence leaves or dirt get flushed down easily
- leachate drains along the center of the floor board into the leachate tanks.
- Aesthetically enhanced and does not distort the logo on the body-sides.

Option to have single-piece steel plate for sides and floor , ie without vertical weld-seam.

Drip-tray for any oil leakages to channel to the leachate tank

Sieve located at the front of REL body to channel leachate into 2 leachate tanks at the sides of body.

Leachate tanks under hopper with 2" or 3" ball valve c/w cam-lock cap.

Optional reverse sensor .

Features & Upgrades included for this particular project ZP3791:

- Auto-Continuous packing cycle with CANbus system
- PTO only engage when transmission is in neutral position
- CCTV & reverse sensors with audible alarm
- Low-oil level cum High-oil temperature warning & auto-cut off
- double-layer hopper wear-plate 6mm+4mm with Hardox450
- SLOT-grease Auto-lub for packer and carrier bearings
- LED side-strobes and beacons
- Full plate for body sides and floor without vertical seam-welds
